

Engagement Proposal – {{CLIENT_NAME}}

Prepared by AICloudStrategist · Founder-led. Enterprise-reviewed.

Anushka B, Founder · AICloudStrategist

{{PROPOSAL_DATE}}

Engagement Proposal – {{CLIENT_NAME}}

Prepared for: {{CLIENT_PRIMARY_CONTACT}}, {{CLIENT_TITLE}},
{{CLIENT_NAME}} **Prepared by:** Anushka B, Founder ·
AICloudStrategist **Proposal date:** {{PROPOSAL_DATE}} **Valid
for:** 14 days from the date above

1. Context

{{ONE_OR_TWO_PARAGRAPHS_SUMMARISING_THE_CLIENT_SITUATION.
Write this from the Cloud Cost Health Check call transcript.
Capture: what they said about their cloud footprint, their
monthly spend band, the team size, the specific pain points
mentioned (“the bill has grown 40% but revenue only 15%”,
“nobody owns cloud cost”, “we can’t explain the AWS line
item to the board”), any deadlines or triggers (funding
round, audit, migration, re-platform).}}

2. What We Observed in the Health Check

Based on the 7-day Cost and Usage Report sample shared on
{{HEALTH_CHECK_DATE}} and the 30-minute discussion that
followed:

1. {{FINDING_1_HEADLINE}} – {{2-3 sentences. What the data
shows; the likely root cause; the INR figure at stake per
month.}}
2. {{FINDING_2_HEADLINE}} – {{Same format.}}
3. {{FINDING_3_HEADLINE}} – {{Same format.}}

Combined recoverable spend, conservative estimate:
{{TOTAL_RECOVERABLE_PER_MONTH}} / month · approximately
{{TOTAL_ANNUALISED}} / year.

Every figure above traces back to a specific line item in
your billing export. Full workings are available in the
Health Check summary already shared with you.

3. Recommended Engagement

{{PROPOSED_SERVICE_NUMBER_AND_NAME}}

(For example: “FinOps QuickStart” – Service 01; or “Cloud Architecture Review” – Service 07; or a combination.)

Why this service, for you specifically: {{ONE_PARAGRAPH – tie the service’s strengths to the findings in Section 2. Example: “A FinOps QuickStart is the right first engagement because the primary driver of your cost gap is commitment coverage (currently 18% against a stable baseline), not re-architecture. The QuickStart is designed to close exactly this class of gap in four weeks, without disturbing your release cadence.”}}

Scope: - {{SCOPE_ITEM_1 – specific to this client, not generic}} - {{SCOPE_ITEM_2}} - {{SCOPE_ITEM_3}} - {{SCOPE_ITEM_4}} - {{SCOPE_ITEM_5}}

Out of scope for this engagement: - {{THINGS_CLIENT_MIGHT_ASSUME_ARE_INCLUDED_BUT_AREN’T – be explicit}} - {{SECOND_OUT_OF_SCOPE_ITEM}}

Any out-of-scope work can be quoted separately or rolled into a follow-on Implementation Sprint.

4. Timeline

Week	Activities	Your team’s input required
Week 1	{{WEEK_1_ACTIVITIES}}	{{WEEK_1_INPUT}}
Week 2	{{WEEK_2_ACTIVITIES}}	{{WEEK_2_INPUT}}
Week 3	{{WEEK_3_ACTIVITIES_OR_DELETE_ROW}}	{{WEEK_3_INPUT}}
Week 4	{{WEEK_4_ACTIVITIES_OR_DELETE_ROW}}	{{WEEK_4_INPUT}}

Kickoff date proposed: {{PROPOSED_KICKOFF_DATE}} **Completion date:** {{PROPOSED_COMPLETION_DATE}}

5. Deliverables

On completion of this engagement you will have:

1. {{DELIVERABLE_1}}
2. {{DELIVERABLE_2}}
3. {{DELIVERABLE_3}}
4. {{DELIVERABLE_4}}
5. {{DELIVERABLE_5}}

Deliverables are version-controlled in your git repository. Architecture diagrams and runbooks are editable formats (draw.io, Markdown) – not locked PDFs. You own everything.

6. Investment

{{PROPOSED_SERVICE_NAME}}

Line Item	Amount
{{SERVICE_NAME}} – fixed fee	▫ {{FIXED_FEE}}

GST @ 18% (if applicable)	□{{GST_AMOUNT}}
Total	□{{TOTAL_INR}}

Payment schedule: - 50% on engagement kickoff – □
 {{FIFTY_PERCENT}} - 50% on completion and deliverable
 acceptance – □{{FIFTY_PERCENT}}

Optional – Gain-Share on Verified Savings

For engagements where the primary outcome is measurable cloud cost savings, we offer a gain-share model that aligns our incentives with yours:

- We agree a **savings floor** of □{{SAVINGS_FLOOR}} / month in verified recoverable spend
- If verified savings exceed the floor in the three billing cycles following implementation, AICloudStrategist receives {{GAIN_SHARE_PERCENT}}% of the excess, capped at □{{GAIN_SHARE_CAP}} per month for 6 months
- If verified savings do not exceed the floor, no gain-share is due – only the fixed fee applies

Gain-share is optional and must be agreed in writing before kickoff.

7. How We Work

- **Engagement delivery:** Founder-led by Anushka B (7+ years independent cloud / DevOps / automation practice). Every deliverable carries senior-architect oversight – 22+ years of Fortune 500 and global-consulting experience reviewing the work before it reaches you.
 - **Communication:** Your channel – Slack, Teams, or email. Weekly written status every Friday. Fortnightly 30-minute review call. On-demand ad-hoc availability within Indian business hours.
 - **Access:** Read-only IAM access to your AWS / Azure / GCP accounts. No write access requested during diagnostic engagements. For implementation engagements, access scope is agreed workstream-by-workstream.
 - **Confidentiality:** A Mutual NDA is signed before any client data is shared. DPDP Act 2023 readiness is embedded in our Master Services Agreement.
 - **Data handling:** All engagement data is stored in encrypted volumes on infrastructure we control. Nothing is uploaded to third-party AI services, analytics platforms, or vendor dashboards without your explicit written approval.
 - **Tooling:** Open-source first. OpenCost, Infracost, OpenTelemetry, Terraform, ArgoCD, Prometheus, Grafana. When the engagement ends, you own the tooling, the configuration, and the institutional knowledge. No vendor lock-in.
-

8. Contracts and Signing

Engagement is governed by two documents:

1. **Master Services Agreement (MSA)** – one-time, covers commercial terms, confidentiality, data handling, IP, and dispute resolution
2. **Statement of Work (SoW)** – this document, signed at engagement kickoff

Both are executed via **Aadhaar eSign** – no courier, no printing, ten minutes from draft to signed.

The MSA can be reviewed by your legal counsel prior to signing. We are happy to accommodate reasonable redline comments.

9. Next Steps

1. **Review this proposal.** If any section needs adjustment – scope, timeline, pricing, gain-share structure – reply to this email with comments. We will revise and re-send within 24 hours.
2. **Confirm kickoff date.** Once the proposal is approved, we will send the MSA and SoW for Aadhaar eSign.
3. **Kickoff call.** Scheduled for the proposed kickoff date above. 60 minutes. Your team and ours. We walk through access provisioning, data exchange, and the week-one plan.

If this proposal is approved within 14 days, the commercial terms above are locked. After 14 days, we may need to re-quote based on updated capacity and pricing.

10. Why AICloudStrategist

We are a focused practice, not an agency. Founder-led delivery with senior-architect oversight on every review. Nine service offerings – all fixed-scope, fixed-fee. INR-first pricing. Open-source tooling. You own everything we deploy.

Recent thinking from our practice:

- aicloudstrategist.com/proof.html – four representative pattern studies covering FinOps, multi-region cost, AI/GPU optimisation, and DevOps transformation
 - aicloudstrategist.com/services.html – full service catalogue with pricing and timelines
 - aicloudstrategist.com/downloads – open resources: AWS Cost Optimisation Checklist (30 leak points) and FinOps Maturity Self-Assessment
-

Appendix A – About the Founder

Anushka B – Founder, AICloudStrategist.

Seven-plus years working independently across DevOps, cloud engineering, FinOps, and AI infrastructure – with Indian startups scaling from seed to Series B and with enterprise teams running production workloads on AWS, Azure, and GCP. Hands-on experience across the full AICloudStrategist service range: cost optimisation, Kubernetes rightsizing, Terraform / OpenTofu IaC, observability (OpenTelemetry / LGTM stack), CI/CD pipelines, GitOps deployment, cloud security posture, and AI/ML infrastructure review.

Every engagement carries senior-architect oversight – 22+ years of Fortune 500 systems-integrator and global-consulting experience reviewing every deliverable before it ships. Founder-level responsiveness with enterprise-grade rigour in the review layer.
