AICloudStrategist

Founder-led. Enterprise-reviewed. FinOps, cloud architecture, AI architecture, DevOps, security, reliability, and managed retainers – fixed-price, fixed-scope consulting for Indian SMBs and mid-market teams on AWS, Azure, and GCP.

Every engagement pairs founder delivery with senior-architect oversight: 22+ years of Fortune 500 and global-consulting weight reviewing every piece of work. Open-source tooling end-to-end – you own everything we deploy.

The Nine Services

#	Service	What you get	Price (INR)	Timeline
01	FinOps QuickStart	Ranked savings backlog with verified □ figures, tagging baseline, 90-day implementation plan	□75,000 – □1,50,000	2 weeks
02	Reliability & Observability Sprint	OpenTelemetry instrumentation, LGTM stack, SLOs tied to business outcomes, multi-burn-rate alerts, runbooks for top 5 incident classes	□1,00,000 – □2,00,000	2–3 weeks
03	Cloud Security Posture Review	Read-only diagnostic mapped to CIS v8, NIST CSF 2.0, OWASP Cloud-Native Top 10, DPDP Act 2023; SOC 2 / ISO 27001 evidence pack	□1,00,000 – □2,00,000	2 weeks
04	Implementation	Hands-on execution of any diagnostic backlog; modular workstreams (FinOps,	□1,50,000 – □3,00,000	4–6

Sprint		security, landing zone, GitOps, Kubernetes, observability)	per workstream	weeks
05	Migration & Re-architecture	7 Rs portfolio, wave-based execution, tested rollback per cutover; data centre → cloud, cloud → cloud, or monolith → microservices	□9,00,000 – □28,00,000	8–16 weeks
06	Managed FinOps Retainer	Continuous cost governance; weekly anomaly triage, monthly exec reporting, RI/SP portfolio management	□45,000 – □1,50,000 / month	Month-to-month
07	Cloud Architecture Review & Consulting	Well-Architected-grade review, gap analysis scored by risk and cost, 30/60/90-day remediation roadmap, IaC-ready recommendations	□1,25,000 – □2,50,000	2–3 weeks
08	AI Architecture Review & Consulting	GPU right-sizing, cost-per-inference dashboard, MLOps maturity, build-vs-buy framework for self-hosted vs managed AI APIs	□1,50,000 – □3,00,000	2–3 weeks
09	DevOps & Platform Engineering	CI/CD modernisation, GitOps, IaC governance, Kubernetes platform, lightweight IDP; engagement measured against DORA metrics	□1,50,000 – □3,50,000	3–4 weeks

Where to start

First time engaging us – begin with the free 30-minute Cloud Cost Health Check. You share a 7-day Cost and Usage Report sample. You receive a two-page written summary by end of the same day, covering the top three cost leaks we would attack first and the recoverable INR against each. No sales process. No follow-up sequence.

Cost is the pain point – FinOps QuickStart (Service 01). The lead service. Most engagements start here.

Architecture or governance is the pain point – Cloud Architecture Review (Service 07). Senior-architect-grade assessment ahead of a funding round, scale event, or post-incident review.

AI / GPU spend growing uncontrollably – AI Architecture Review (Service 08). Cost-per-inference visibility and the build-vs-buy framework most AI teams lack.

Deployments are slow, risky, or manual – DevOps & Platform Engineering (Service 09). DORA-metric-measured engagement.

You have a diagnostic already (ours or someone else's) – Implementation Sprint (Service 04). We execute the backlog.

How we work

- **Payment:** 50% advance, 50% on delivery. NEFT / UPI / wire. GST invoice where applicable.
 - **Contracts:** Master Services Agreement + per-engagement Statement of Work. Aadhaar eSign.
 - **Confidentiality:** NDA before any client data is shared. DPDP-readiness clause embedded.
 - **Tooling:** Open-source first (OpenCost, Infracost, OpenTelemetry, Terraform / OpenTofu, ArgoCD). You own everything deployed.
 - **Communication:** Your channel – Slack, Teams, email. Weekly written status. Fortnightly review call.
 - **Gain-share available** on cost-focused engagements – we share the upside when verified savings cross an agreed floor.
-

Why a focused practice, not an agency

Agencies sell engineering hours. We sell documented outcomes – savings against a baseline, DORA tier movement, risk reduction you can show a board.

Founder-led scoping and delivery. Senior-architect oversight on every review. No junior analyst reading a dashboard. No offshore hand-offs. No 20-page readout that nobody acts on. Decisions happen in the call, not in a follow-up email three weeks later.

Next step

Book a free 30-minute Cloud Cost Health Check →
aicloudstrategist.com/book.html

Or email support@aicloudstrategist.com with your cloud(s), approximate monthly spend, and your top two cost concerns. We will reply the same day.
