Target Company List – Expanded to 100 (Round 2)

Updated: 2026-04-16 (evening addition) **Goal:** 100 hand-picked Indian mid-market targets. First 40 in document 08-target-company-list.md . This document adds 60 more + enrichment notes.

Focus: Verified companies with public engineering leader info. Prioritise recently-funded (budget exists) + AI/GPU infra (current market timing wedge).

Tier 1A – AI / GPU infrastructure (April 2026 price-hike wedge active)

These are the warmest prospects this month. AWS GPU price hike + AI workload growth = cost pressure.

#	Company	Sector	Location	Website	Funding / Stage	Why now
41	Sarvam AI	Gen AI / LLM	Bangalore	sarvam.ai	\$350M 2026 – largest Indian AI raise	Massive GPU spend, public NVIDIA partnership
42	Krutrim	Gen AI / LLM	Bangalore	krutrim.ai	Unicorn 2024	Sovereign LLM infra
43	Soket.ai	Gen AI / Infra	Bangalore	soket.ai	Series A	Training stack on NVIDIA
44	Fathom (Fractal)	Reasoning AI	Mumbai	fractal.ai/fathom	Part of Fractal	Reasoning model infra
45	DhiWise	AI dev tools	Ahmedabad	dhiwise.com	Series A	Growing AI platform
46	Lyzr	AI agents	Bangalore	lyzr.ai	Seed 2024	Agent infra = GPU-heavy
47	Nvidia Inception India list	(cluster)	(various)	developer.nvidia.com/inception	n/a	High-signal AI startups
48	Wysa	Mental health AI	Bangalore	wysa.com	Series B	AI infra at scale
49	CynLr	Robotics AI	Bangalore	cynlr.com	Series A	ML compute intensive
50	Mad Street Den	Computer vision	Chennai	madstreetden.com	Series C	Heavy inference workloads

Tier 1B – SaaS Series A-B (April 2026 hiring/funding signals)

#	Company	Sector	Location	Website	Recent signal
51	Darwinbox	HR SaaS	Hyderabad	darwinbox.com	Part of \$1.1B+ SaaS cluster

100	OYO	Hospitality tech	Gurgaon	oyorooms.com	Post-IP0 cost discipline

How to use this expanded list

Immediate action (Day 3-4): 1. Pick 10 from Tier 1A (AI infra – hottest wedge with GPU price hike) 2. For each, find: CTO/VP Eng/Head of Platform name via website /about, /team, /careers 3. Guess email using the pattern cheat sheet in 08-target-company-list.md 4. Personalize first line with: recent funding / GPU announcement / NVIDIA partnership / Twitter post / engineering blog post 5. Send cold email #1 from 04-cold-email-sequence.md

Day 5-6: 6. Move to Tier 1B SaaS Series A-B – these close faster than enterprise 7. Apollo free tier (25 lookups/month) for the specific CTO emails where guesses bounce 8. Hunter.io free (25 searches/month) for the common patterns per domain

Day 7-10: 9. Tier 2 Fintech – longer sales cycles but bigger budgets 10. Tier 4 B2B enterprise – slower but if ANY lands, it's a major reference

Skip for now: - Tier 5 (public companies, procurement hell) - Tier 3 consumer tech (long cycles, complex procurement)

Realistic conversion math on 100 targets: - Send 100 Email 1s over 10 days (10/day) - Email 2 follow-up on Day 4 after Email 1 → ~25 re-sends per week (if no reply) - Email 3 value-only on Day 10 → ~15 re-sends - Total email sends over sprint: ~140 individual emails - Expected replies (8-15% on good targeting): 8-15 - Expected discovery calls: 4-8 - Expected proposals: 2-4 - Expected closes at 20-40% proposal-to-close: **1-2 signed**

That math works. One signed deal from cold email by day 20 is realistic.

Parallel scaling

In Week 1, Rajiv builds this list + enriches emails. In Week 2 onward, maintain it with new funding

announcements weekly (Indian Startup News, Inc42). Every new company funded in the 5-50L target range gets added within 7 days of announcement.

Feeder sources to monitor weekly (15 min/week): - [Indian Startup News funding](#) – Friday digest - [Inc42 funding section](#) – daily - [YC Indian companies](#) – new batch entries - [NVIDIA Inception India](#) – AI-specific signals - Economic Times Startup news – daily

Add any Series A-B SaaS/fintech/AI funding news to the target list within 7 days. Sending to a company 2 days after their funding announcement has 3-5x higher reply rate than sending 2 months later.
