Target Company List – Initial 40 Companies

Last updated: 2026-04-16 **Criteria:** Indian SaaS / fintech / AI / B2B software. Series A-B or publicly listed. Likely cloud spend 5L-50L+/month. Engineering leader (CTO / VP Eng / Head of Infra) is the buyer.

This is the starter list. Daily target: add 10 new companies, enrich 15 contacts. Goal: 200 hand-picked targets by end of sprint.

How to use this list

1. **For each company**, find the engineering leader on their website (/about, /team) or via Google Search: `site:companyname.com CTO OR "VP Engineering" OR "Head of Infrastructure"`
2. **Guess the email** using the most common format for that company (see patterns below)
3. **Verify the email** – append it to the company's domain, run through [Mail Tester](#) or just send; bounces tell you the format is wrong (try the next pattern)
4. **Personalise the first line** – check their Twitter/X, recent blog posts, or funding announcements for a hook
5. **Send Email 1** from the cold-email-sequence doc
6. **Log in Vikunja tracker** – `vk add 7 "Reached out to {firstname} at {company}" "Email pattern: {pattern}. Personalisation: {hook}."`

Email pattern cheat sheet (try in this order)

1. `firstname@company.com` (most common for Indian startups)
2. `firstname.lastname@company.com`
3. `f.lastname@company.com`
4. `flastname@company.com`
5. `firstname_lastname@company.com`

To verify: Hunter.io free tier (25/month) gives you the known pattern per domain. Or use email-verifier.io. Or just send and watch for bounce.

Tier 1 – Immediate priority (funded 2025-2026, growing infra)

Funding-signal list (recently raised, so budget exists)

#	Company	Sector	Location	Website	Funding	Spend band	Hook
1	Gnani.ai	AI / Gen AI	Bangalore	gnani.ai	\$7M Series A 2026	10-25L/mo	AI = GPU cost pressure. Our cost-per-1000-inferences post
2	Deccan AI	AI Services	Hyderabad	deccan.ai	\$25M Series A 2026	15-40L/mo	Perfect ICP. Recent raise. Pitch GPU audit

3	Kaar Technologies	ERP Services	Chennai	kaartech.com	\$11M Series A 2026	5-15L/mo	Services firm – their clients pay AWS bills
4	Grapevine	HRTech	Bangalore	letsgrapevine.com	\$4.1M Series A 2026	5-10L/mo	Growth-stage = perfect timing
5	Care.fi	Healthcare IT	Gurgaon	care.fi	\$5M Series A 2026	5-12L/mo	Healthtech infra sensitivity
6	Tsecond.ai	AI Infra / Defense	Bangalore	tsecond.ai	\$21.5M Series B 2026	20-50L/mo	AI infra = cost chaos
7	NowPurchase	Materials Tech	Kolkata	nowpurchase.com	\$8.5M Series B 2026	5-12L/mo	B2B SaaS, data-heavy
8	Bamboobox	MarketingTech	Bangalore	bamboobox.ai	\$6.6M Series B 2026	5-10L/mo	Data pipelines = cost
9	CometChat	Customer Success	Mumbai	cometchat.com	\$6.5M Series B 2026	10-25L/mo	Real-time infra = high spend
10	Atlas	Accounting SaaS	Bangalore	atlas.co (verify)	\$6M Series A Apr 2026	5-10L/mo	Fresh money in the door
11	Astranova Mobility	Fintech/Lending	Bangalore	astranova.in (verify)	\$6.44M Series A Apr 2026	5-12L/mo	Lending = compliance-heavy infra
12	KreditBee	Fintech/Lending	Bangalore	kreditbee.in	\$280M 2026	30-80L/mo	Massive raise, massive infra

Pre-IPO / recently listed (biggest potential but hardest to reach)

#	Company	Sector	Location	Website	Stage	Notes
13	Amagi	Broadcasting SaaS	Bangalore	amagi.com	Listed Jan 2026	Video = massive egress costs
14	Fractal Analytics	Analytics	Mumbai	fractal.ai	Listed Jan 2026	Data platform = cloud-heavy
15	InMobi	Adtech	Bangalore	inmobi.com	DRHP filed	Ad serving infra – high spend
16	Meritto	Edtech SaaS	Noida	meritto.io	DRHP filed	Growing, infra scrutiny high pre-IPO
17	Razorpay	Payments	Bangalore	razorpay.com	Pre-IPO	Payment infra = reliability + cost

18	InCred	Lending	Mumbai	incred.com	DRHP filed	Fintech infra scrutiny pre-IPO
19	Moneyview	Lending	Bangalore	moneyview.in	DRHP filed	Same
20	Navi	Payments	Bangalore	navi.com	Pre-IPO	Same

Known YC India (likely AWS users, founders accessible)

#	Company	Sector	Location	Website	YC Batch	Notes
21	ClearFeed	Slack analytics	Bangalore	clearfeed.ai	W22	B2B SaaS
22	Fountane	Dev tooling	Bangalore	fountane.com	W21	Services+SaaS
23	Tailor Insights	Insurance tech	Mumbai	tailorinsight.com	S23	Insurance SaaS
24	Spenmo	Spend management	Bangalore	spenmo.com	S21	Fintech
25	Zuddl	Event platform	Bangalore	zuddl.com	S21	Media-heavy infra
26	Nurix	Automation	Bangalore	nurix.ai	S23	AI ops – high GPU
27	Sprinto	Compliance SaaS	Bangalore	sprinto.com	W22	SaaS, growing
28	Hasura	GraphQL	Bangalore	hasura.io	W18	Infra-heavy, probably has FinOps
29	FarmERP	Agritech SaaS	Pune	farmerp.com	–	B2B ag SaaS
30	Clinikk	Healthtech	Bangalore	clinikk.com	–	Healthtech SaaS

Tier 2 – Mid-market established (known AWS/Azure users)

Research these: larger established Indian SaaS where the infrastructure lead is a real buyer. All of these are likely 15L+/month cloud spend.

#	Company	Sector	Website
31	Freshworks	CRM / SaaS	freshworks.com
32	Zoho	SaaS Suite	zoho.com
33	Postman	API Tools	postman.com
34	Browserstack	Dev Tools	browserstack.com
35	Gupshup	Conversational AI	gupshup.io
36	Khatabook	Fintech SMB	khatabook.com
37	Urban Company	Services	urbancompany.com
38	MPL (Mobile Premier League)	Gaming	mpl.live

39	CRED	Fintech	cred.club
40	Groww	Wealth/Investing	groww.in

Personalization hooks to look for

For each target, spend 5 minutes researching:

1. **Last funding round date + amount** – “Congrats on the Series B” (only if recent, <3 months)
2. **Recent hiring** – “Saw you’re hiring X platform engineers” (infra scaling signal)
3. **Recent engineering blog post** – “Read your post on {topic}” (trust signal)
4. **CEO/CTO Twitter/X activity** – “Your thread on {topic} last week”
5. **Product launch** – “Saw the {product} launch”
6. **Conference talk** – “Caught your talk at {event}”
7. **GitHub activity** – “Saw your team’s open-source work on {project}”
8. **Podcast appearance** – “Listened to your episode of {podcast}”

If you can’t find ONE specific hook, move on. Generic cold email is worse than no email.

Daily workflow

Morning (30 min)

1. Pick 10 companies from the list
2. Find the engineering leader for each (CTO, VP Eng, Head of Infra) via website / Google / public speaker lists
3. Guess email using pattern cheat sheet
4. Find ONE personalization hook per company

Outbound (30 min)

5. Send Email 1 from cold-email-sequence.md – always personalized first line
6. Log in Vikunja tracker under Sprint project
7. Schedule Email 2 follow-up for day 4

Reply handling (10 min at 2pm and 6pm IST)

8. Check inbox for replies
9. Reply within 4 business hours with substantive response
10. Move to discovery call if they’re warm

Scaling the list beyond these 40

Free sources to mine: - [Indian Startup News weekly funding](#) – refresh weekly - [YC Indian companies](#) – 150+ entries - [Inc42 funding tracker](#) – daily updates - [Tracxn free search](#) – sort by last funding date - [Growth List India](#) – 3,900+ funded companies - [Top Startups India](#) – hiring-signal filter - [Economic Times Startup news](#) – daily - [AWS Partner Network India directory](#) – filter: India + Consulting

Paid but cheap options (if needed): - Apollo.io \$49/month – 1200 lookups + email enrichment - Hunter.io \$49/month – email finder + verifier - Skrapp.io \$49/month – similar to Hunter

Avoid: ZoomInfo (overkill for solo), Lusha (expensive), Apollo free tier is enough for sprint.

Tracking

Keep a Google Sheet mirror of this list with columns: Company | Domain | Leader Name | Leader Title |
Guessed Email | Email verified | Hook used | Day 0 sent | Day 4 sent | Day 10 sent | Day 18 sent | Replied? |
Call booked? | Status

Update the sheet daily. Review with Rajiv every Monday.
